

# DENTIST

**Rules:** You are the dentist and the object is to find a lot of cavities so that you can make a lot of money doing fillings. Need a game piece and a dice to play. Start at the top left tooth, and work on one at a time. For each tooth, roll the dice: 1 = cavity, 2-6 = no cavities. Work on each tooth, going through in a clockwise direction. Charge \$20 per cavity, see how much you've earned when you're done!
